

Every process, orchestrated end-to-end.

DigiVouch Platform is the enterprise low-code / no-code engine that turns any paper-based process into an automated, governed, end-to-end digital workflow.

1

platform, every
process
low-code / no-code

✓ Low-code / no-code

✓ Any process

✓ Full orchestration

Product overview. DigiVouch Platform is DigiCore's enterprise low-code / no-code process automation platform. It extends the DigiVouch document engine into full **end-to-end business processes** — forms, workflow, approvals, integrations, e-signature and archival — assembled visually and governed centrally, so business teams automate paper-based journeys without rebuilding core systems.

01 THE CAPABILITY SUITE

Visual Process Designer

Low-code / no-code, drag-and-drop

Dynamic Forms

Smart forms with rules & validation

Workflow & Approvals

Multi-level, role-based routing

Integration Hub

APIs, core systems, DMS & gateways

e-Signature & Stamp

Via DigiSign — legally binding

Governance & Audit

Central control, full traceability

1

platform, every process

0

code to change core

100%

governed & audited

∞

processes you build

Figures indicative — AIS reference model.

02 THE LIFECYCLE

Design → Form → Route → Approve → Sign → Integrate → Archive → Audit

03 HOW THE PLATFORM WORKS

01

Design Visually

Assemble the process on a low-code / no-code canvas — no core rebuild

02

Build the Form

Smart forms with rules, validation and dynamic fields

03

Route & Approve

Multi-level, role-based workflow with SLAs and overrides

04

Sign & Stamp

e-signature and stamps via DigiSign — legally binding

05

Integrate

Connect core systems, DMS / ECM and gateways through the hub

06

Archive & Govern

Every step archived and traceable under central governance

04 WHERE THE PLATFORM RUNS

Customer & Corporate Onboarding

KYC, account opening and corporate onboarding assembled as governed, end-to-end digital journeys — forms, checks, signatures and archival in one flow.

Outcome — onboarding as one governed journey

Lending & Credit Origination

Application, documentation, approval and disbursement workflows automated end-to-end, with policy checks and e-signature built in.

Outcome — faster credit, controls built in

Service Requests & Operations

Internal and customer service processes — requests, approvals and fulfilment — digitised without touching the core.

Outcome — paperless operations, no core rebuild

Compliance & Governance Workflows

Regulatory and internal governance processes modelled, routed and archived with a full audit trail on every step.

Outcome — audit-ready governance by design

DigiVouch Platform wraps the journey in a process. DigiVouch produces the controlled document; the Platform orchestrates the full workflow around it; DigiSign signs, DigiVerify verifies, and AI Fabric executes any step that needs intelligence. One connected digital journey.

05 KEY DIFFERENTIATORS

- Low-code / no-code — business teams build the process
- Full end-to-end orchestration, not output-only
- Central governance and audit across every workflow
- Integration hub — core systems, DMS & gateways
- Built-in e-signature and stamp via DigiSign
- Non-intrusive — no change to the systems you run

06 ARCHITECTURE, INTEGRATION & DEPLOYMENT

- API-first: REST / SOAP, JSON / XML, token auth, TLS 1.2+
- Visual designer, workflow engine and integration hub
- HA: load-balanced tier, MS SQL Always On
- Deployment: On-Premises, Private Cloud or Hybrid
- Integrates with core systems, ECM / DMS and gateways
- Interoperable with the full DigiCore suite

07 KEY VALUE PROPOSITIONS

Strategic

One platform to automate every paper-based process.

Operational

Business teams build workflows — minimum time to market.

Experience

Governed, end-to-end digital journeys for every user.

Sustainability

Paper and manual handling removed across the enterprise.

UNIQUE VALUE PROPOSITION

An enterprise low-code / no-code platform that transforms any paper-based process into a governed, end-to-end digital workflow — forms, approvals, integrations, e-signature and archival assembled visually and controlled centrally, with zero change to the systems you already run.

Low-Code / No-Code

Visual Designer

Dynamic Forms

Workflow & Approvals

Integration Hub

e-Signature

Central Governance

Full Audit Trail

Zero Core Change

Built on the proven DigiVouch engine.

The Platform extends DigiVouch — deployed at scale replacing 300,000+ monthly printouts across 400+ service points — into full end-to-end process automation, so institutions move from digitised documents to fully orchestrated, governed digital workflows.

Figures quoted are indicative and drawn from AIS reference deployments; final results depend on scope, volumes and phasing, and should be confirmed with the product team before client delivery. Use cases listed are representative, not exhaustive.
